

# FB BRACKET

## SOLAR FIXTURE BRACKETS

### FB Fixture Bracket

SEPCO Solar Lighting Fixture Brackets are used with complete solar lighting systems to complete the system and allow for mounting the fixtures to a pole or ground mounting for some applications.

The Fixture Bracket (FB) supports ground mounted flood lights, uplights, flag lights and landscape lights. The aluminum, steel, or PVC top cap comes with a 1/2" NPT hole in the center with a 1/4" set screw. The 48" x 2" Schedule 40 Aluminum pipe comes standard in silver but can be powder coated upon request.
