# SOLARBOLLARD LED LIGHTING

The SolarBollard is a complete system used for pathways, walkways, and area lighting projects.

The Bollard fixtures are efficient and provide great light output with symmetrical or asymmetrical distribution patterns.

Multiple fixtures are powered by a single solar power assembly to produce a more reliable system.

### Features & Benefits

- Grid Free Lighting Systems
- High-Powered LED Light Fixtures
- Easy Installation
- Environmentally-Friendly Lighting Solution
- Zero Electric Bills
- No Trenching or Disturbing Surrounding Areas
- Minimum 5 Night Backup
- Sized According To Installation Location and Project Specifications
- Light Where and When You Need It
- Poles To Meet AASHTO Wind Load Requirements
- Marine Grade Aluminum & Stainless Steel Fasteners For Harsh Environments
- Manufactured in Stuart, FL Since 1994

The SolarBollard high-powered LED solar lighting system comes complete with solar power assembly, fixture, bracket, and all mounting hardware to attach to a pole. SEPCO can also provide a pole to meet wind load specifications.

The solar power assembly is sized to meet the load requirements at the installation location. System sizing is based on the load, operation requirement, and geographical location sun availability.

Every SEPCO solar lighting system comes with a minimum of five nights backup to ensure plenty of backup for times of inclement weather. Systems are designed to maintain light levels without reduced output or failures.

The bollard fixture comes complete with LEDs and driver to operate directly off the 12-24 VDC solar power assemblies. These fixtures are offered with multiple distribution patterns and color temperatures. Standard finishes are also available.
