SOLARLSQ LED LIGHTING

The SolarLSQ is a complete system used for building, pavilion, walkway, and area lighting projects.

The LSQ canopy fixture is an efficient budget-friendly fixture and provides a great light output with a soft glow lens.

This fixture works best for applications for overhead lighting and can evenly illuminate an area 10-15' depending on mounting height.

Features & Benefits

- Grid Free Lighting Systems
- High-Powered LED Light Fixtures
- Easy Installation
- Environmentally-Friendly Lighting Solution
- Zero Electric Bills
- No Trenching or Disturbing Surrounding Areas
- Minimum 5 Night Backup
- Sized According To Installation Location and Project Specifications
- Light Where and When You Need It
- Poles To Meet AASHTO Wind Load Requirements
- Marine Grade Aluminum & Stainless Steel Fasteners For Harsh Environments
- Manufactured in Stuart, FL Since 1994

The SolarLSQ high-powered LED solar lighting system comes complete with solar power assembly, fixture, bracket, and all mounting hardware.

The solar power assembly is sized to meet the load requirements at the installation location. System sizing is based on the load, operation requirement, and geographical location sun availability.

Every SEPCO solar lighting system comes with a minimum of five nights backup to ensure plenty of backup for times of inclement weather. Systems are designed to maintain light levels without reduced output or failures.

The LSQ canopy fixture comes complete with LEDs and driver to operate directly off the 12-24 VDC solar power assemblies. These fixtures are offered with an impact-resistant acrylic diffuser and various color temperatures. Standard finishes are also available.
