

CAPABILITIES

SOLAR ELECTRIC POWER COMPANY

Business Summary

SEPCO – Solar Electric Power Company specializes in commercial solar lighting and off grid solar power systems manufacturing. We produce high quality solar power systems combined with high performance and efficient LED light fixtures. All of our systems meet ARRA guidelines, 150 MPH hurricane class wind load ratings, and are build to meet the specific needs of the customer / project. We also provide CFL, metal halide, induction, HPS, LPS, and turtle friendly lighting.

Capabilities

- Solar Lighting Systems
- Off-Grid Solar Power Systems
- Stand-By Solar Power Systems

Expertise

Owner Steve Robbins designed and patented the world's first commercial solar street light and has been the industry leader for over two decades. Every solar power system and fixture goes through rigorous testing and is manufactured specific to each application. We can provide lighting plans and other engineering documents for each individual project.
