

LNC FIXTURE

DC SOLAR POWERED LIGHT FIXTURE

Larado Fixture Overview

The LNC Laredo fixture assembly is a wall pack style fixture and comes complete with LEDs and driver used to operate the fixture from the solar charged batteries. The LNC fixture is typically used for buildings, pavilions, stairwells, entryways, perimeters, and corridors and mounts to any wall with the solar power assembly mounted nearby on a roof or pole.

SEPCO solar light fixtures are used in our complete solar lighting systems and includes the solar power assembly with mounting, battery assembly, fixture and fixture mounting bracket. SEPCO can also provide a pole to meet wind load specifications.

Features & Benefits:

- The LNC fixture uses solid state / light emitting diode (LED) light source
- 12 VDC electronic dimming drivers
- Die cast aluminum housing
- Multiple light distributions available

APPLICATIONS: Buildings, Pavilions, Stairwells, Entryways, Perimeters, Corridors

HOUSING: Die Cast Aluminum

FINISH: Bronze, Black, Gray, White, Platinum Silver

OPTICAL ASSEMBLY: Full cut-off- neighbor friendly IDA approved

LAMPING: 5 – 17 Watt LED Type III and IV

DIMENSIONS: 6.25" Deep x 10.25" Wide x 5.6" High

WEIGHT: 7 lbs

EPA: .50 sq ft
